HİKAYEMİZ • OUR STORY

70 yıllık bir geçmişi olan **Seyidoğlu Gıda**, helva, reçel, tahin-pekmez ve kakaolu krema başta olmak üzere 300'den fazla ürün çeşidiyle pek çok yeniliğe imza atmış olup, lezzeti ve kalitesiyle tüketicinin tercih ettiği sektörün öncü markalarından biridir.

1950'li yıllarda baklavacılıkla işe başlayan **Seyidoğlu**, 1970'lere gelindiğinde Yönetim Kurulu Başkanımız olan **Necati Göksu**'nun girişimleriyle **Seyidoğlu Gıda Sanayi ve Ticaret Anonim Şirketi** olarak yapılanmış ve helva, reçel, tahin-pekmez gibi yeni ürünlerle faaliyetlerine devam etmiştir. Günümüzde ise hızla büyüyerek Türkiye'de ve dünyada tercih edilen bir marka olmuştur.

Günde 150 kilo helva üretimiyle başlayan bu serüven, 2005'ten itibaren İstanbul Hadımköy'deki 8 bin metrekare kapalı alana sahip tesislerde, şimdilik 40 ton helva, 60 ton reçel, 30 ton kakaolu fındık kreması ve 20 ton tahin-pekmez üreterek devam etmektedir. Yeni Fabrika ek tesis yatırımıyla **Seyidoğlu gıda** kapalı üretim alanını 20 bin metre karenin üzerine çıkarmıştır. Seyidoğlu Genel Müdürlüğü'nü üçüncü kuşak olan **Mehmet Göksu** yürütmektedir.

With its seven-decade history, **Seyidoğlu is a leading company** in the dessert industry, offering a variety of original flavors including halva, jam, tahini, molasses and cocoa cream, and a trusted brand among consumers with its delicious, quality products.

Having started business in the 1950s as a baklava maker, **Seyidoğlu** expanded into a corporate structure in the 1970s under the leadership of our Executive Board Chairman **Necati Göksu**, who founded **Seyidoğlu Food Industry and Trade Inc.** and added helva, jam and tahini-molasses varieties to the company's product range. Rapidly growing both locally and internationally, today Seyidoğlu has become a popular brand with consumers in both Turkey and numerous other countries.

This adventure, which started with the production of 150 kilos of Halva per day, has been continuing since 2005 by producing 40 tons of Halva, 60 tons of Jam, 30 tons of Hazelnut Cream with Cocoa and 20 tons of Tahini-Molasses in facilities with a closed area of 8 thousand square meters in Hadımköy, Istanbul. **Seyidoğlu Gıda** increased its closed production area to over 20 thousand square meters with the investment in the new factory and additional facility. **Mehmet Göksu**, the third generation, is the General Manager of Seyidoğlu.

Essential Policies of Our Company

KALİTE BELGELERİMİZ • OUR QUALITY CERTIFICATES

Yarım asırlık güveninizi, uluslararası standartlarda tescillettik.

Seyidoğlu Gıda Sanayi ve Tic. A.Ş. kalite ve gıda güvenliği yönetim sistemini FSSC 22000 ve ISO 9001, TSE Helal standartlarının gereklerine uygun olarak uluslararası standartlarda tescil ettirmiştir.

Gıda endüstrisinde gelişen teknolojiler, toplumda tüketici bilincinin yerleşmesiyle birlikte gıda güvenliğinin önem kazanması, dünya üzerinde farklı kontrol sistemlerinin ortaya çıkmasına yol açmıştır. HACCP (Hazard Analysis at Critical Control Points) "Kritik Kontrol Noktalarında Tehlike Analizi" bu uygulamalar içinde son yıllarda isminden en çok söz edilen kontrol sistemidir.

Üründe oluşabilecek, insan sağlığına zararlı mikro-organizmaların ve zararlıların, ürün tüketiciye ulaşmadan ortadan kaldırılmasını amaçlayan HACCP Sistemi; hammaddenin temininden başlayarak, üretimin tüm aşamalarında ve üretim sonrası ürünün sevk işleminden, kullanım süresinin sonuna kadar gıda güvenliği için gerekli şartların yerine getirilmesine kadar kontrol etmektir.

We have registered your half century-old trust with international standards.

Seyidoglu, with FSSC 22000 certificate for food safety and with ISO 9001, TSE certificate to increase customer satisfaction, has registered its quality and corporateness with international standards.

Advancing technologies in food industry has caused a consumer awareness to be established in the society, food safety to become important and different control systems to be established in the world. HACCP "Hazard Analysis at Critical Control Points" is the most important control system among these implementations.

HACCP System which aims to eliminate the microorganisms and harmful substances which can be produced on the product and which are harmful against human health before the product is delivered to the customer; means to control the fulfillment of the necessary requirements of food safety starting from supply of the raw material and up to all phases of the production, shipment process after the production and until the end of the operating period.
